

STARTER FLATS & PRE-FINISHED GERANIUMS

DOING YOUR OWN TRANSPANTING MIGHT BE COSTING YOU MORE

Have you considered...

The supply of tags, containers, and soil mix that you have to plan, order, store, and pay for?

The leftover inventory expense when buying enough supplies to meet minimums or get a volume discount.

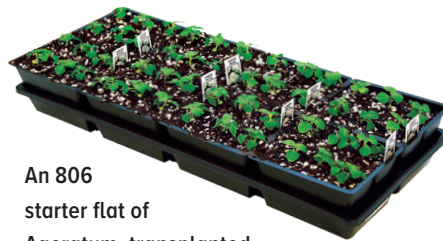

The difficulty of getting good transplanting help, or trying to keep your employees busy between transplanting time and shipping?

Whether you could sell more if only you had time to plant it? Or whether you could make another turn or refill some empty space?

Our modern transplanting equipment allows us to plant quickly and efficiently!

An 806 starter flat of Ageratum, transplanted from a 512 tray.

WE'LL PRE-PLANT THEM FOR YOU!

Since we already have the inventory, trained employees, and state of the art equipment, why not let us transplant for you!

We offer low minimums for ordering and delivery to fill your "empty spots", and we'll deliver your pre-planted product just in time to open and fill your houses efficiently.
